T33T Banaba Island –update

Latest update from Rebel DX Group via their Facebook [page](#) (0130z). DX-World will be assisting Dom & co in this humanitarian project (as per [this info](#) last week).

'We are still at the Banaba but out of fuel for the generators.. We are waiting for our vessel to pick us up. We will concentrate now on humanitarian project called "Hams for Banaba Kids". We will continue what Zorro JH1AJT (S.K) started years ago. Information will be sent to the public after we're back home to Europe. There's a lot of simple things to do for those kids. It will cost us almost nothing to make them happy. We joined kindergarten graduation yesterday. Here is some pictures. Even on extremely remote place like Banaba, kids having graduation party. More pictures and movies soon.'

3Y0J Bouvet Island –update

We have updated our webpage with the propagation predictions based on our actual antenna setup at Bouvet. This work has been performed in close cooperation with world leading expert Stu K6TU. See [here](#)

The key to getting realistic predictions that map to the real world is antenna modelling. Stu has done tremendous background work and research during last year where he has worked several hundreds of hours by preparing the basis for these predictions. Yes, the terrain at Bouvet is challenging, and the predictions are only predictions and may vary by 1-2 S units in both directions. The Bouvet team has done the predictions ourselves by using the HFTA software and by using our subscription at K6TU website. <https://www.dx-world.net/info-3y0j-bouvet/>

VK9NT Norfolk Island –update

The VK9NT team has decided to do something innovative and unique in 2023. We'll be running a DXpedition Bootcamp and inviting people to register to attend and be a part of this event.

I'm writing to you seeking support for publicity and endorsement. Would you be willing to allow us to include your logo and a link on our website, and would you promote this event via your website?

<http://dxpeditionbootcamp.net/hello-world>

This initiative is about promoting and supporting DXpeditioning first and foremost.

Should you have any questions or wish to discuss, please contact me.

73, Chris VK3QB
VK9NT Team Leader

YJ, Vanuatu DXpedition 2024

We now have six hams committed to going. We are looking for two more hams and their wives to join us. After we reach eight hams we will accept additional hams for standby only. We are all excited not only for the adventure but for the operating time in a rare DX. Feel free to call or email for more information. <https://www.dx-world.net/vanuatu-dxpedition-2024/>

TN5K Congo –update

The team has secured a fenced QTH with dimensions of approx. 6000m2, on a peninsula, in flat terrain approx 500m from the sea. This location does not have public electricity and therefore will be powered entirely by generators only. The estimate of diesel fuel needed for their operation is 1400 liters at a cost of approximately 1 Euro or 1 US \$ per liter.

3B7M Saint Brandon –update

After long discussion with team members 3B7M will be active on QO-100 Sat. Hardware is ready, the only problem is dish, but they hope to agree with local 3B8 hams and activate QO-100 from 3B7. Stay tuned!
